

LIFECYCLE AA COMPOST TECHNOLOGY SHEET

LIFECYCLE AA COMPOST, THE HIGHEST STANDARD SOIL AMENDMENT THAT SUPPORTS SOIL HEALTH BY PROVIDING NUTRIENTS AND PROTECTION.

- Improves and supports healthy soil structure through positive microbial activity, increased organic matter content, aggregation and optimized moisture retention.
- Helps neutralize acid and alkaline soils, bringing pH levels to an optimal range for plant nutrient availability.

•Contains macro and micronutrients which are released slowly to support plant development and health.

•Protects soils against runoff and erosion as a sustainable alternative to chemical fertilizers.

CONTENTS:

Municipal green bin scraps and leaf and yard trimmings

FEEDSTOCK:

Residential source separated organics

PROCESSING SYSTEM:

In-vessel aerated static pile

QUALITY LEVEL:

AA Compost (unrestricted),
CQA Certified

Lifecycle AA compost.

Average Organic Matter	45%
Average Moisture Content	44%
Average pH	6.27

APPLICATION TIMING AND RATE:

Optimum timing is late fall or before planting in the spring.

APPLICATION TIPS:

Use by the following season.

Mixing prior to application is recommended, if possible, to bring up damp bottom layer into the top drier layer.

Mix 1 part compost with 10 parts soil (dependent on soil test results and plant type).

Product may produce dust and odour, check climatic conditions before application.

STORAGE:

Keep covered by a tarp or plastic sheeting to retain moisture and protect compost from the elements.
